

Rendez-Vous Celestial

The celestial map in the palm of your hand

A new, feminine interpretation of a unique horological feature – the celestial map – explores the full range of artistic possibilities offered by Métiers Rares® and practised at the heart of Manufacture Jaeger-LeCoultre for generations. With its enamel watch dial, hand-painted lapis lazuli sky, its bezel set with sapphires and its shimmering diamonds, the Rendez-Vous Celestial makes a striking statement. Taking its inspiration from the spectacular lightshow of the aurora borealis, this jewel of creativity holds in its beating heart the Jaeger-LeCoultre 809/1 automatic movement.

A fiery temperament beneath a brightly coloured wave of pink and blue

Its generous 37.5mm dial traces the moving constellations of the stars with precision. Powered by its automatic movement, time passes in beauty with captivating hues of deep blue to intense purple, colours prized, rare and precious in the world of Haute Horlogerie. Against this backdrop suffused with shades of amethyst, the celestial map, viewed from the northern hemisphere, gracefully rotates.

The most beautiful expression of the Métiers Rares™

From its crown of baguette cut sapphires, to the light play that reflects like a mirror, and its inviting pool of blue, pink and violet hues, the Rendez-Vous Celestial is both a piece of jewellery and a work of art, fully harnessing the inventiveness and genius of the Maison's Métiers Rares®. Under a clear sky, the dial's magical colours continue round the rim of the case, while the grey gold star remains poised at the whim of the wearer. A rendez-vous awaits.

Collection Rendez-Vous

Besides the comfort and practicality offered by its automatic movement, the Rendez-Vous collection has gained a wealth of new characteristics, to be discovered in a personal and intimate way like so many unique adventures awaiting you. Each of these interpretations is the fruit of many long hours in the Vallée de Joux workshops, and now their story continues as they go to join the woman who will wear them, and an enduring chapter opens. Truly, madly, deeply...

THE JAEGER-LECOULTRE MANUFACTURE

Since its creation, Jaeger-LeCoultre has been delighting and surprising devotees of beautiful objects. In keeping with the inventive spirit initiated in 1833 by its founder Antoine LeCoultre, the artisans of the Manufacture combine their talents and expertise to create collections which have been at the forefront of watchmaking both technically and artistically: Reverso, Master, Rendez-Vous, Duomètre, Geophysic and Atmos – this rich legacy built by the Grande Maison over centuries serves as a constant source of inspiration in its ongoing pursuit of excellence. In the wake of many legendary models, the 21st century has seen the emergence of the Hybris Mechanica™ and Hybris Artistica™ collections. These rare pieces are as surprising as they are sophisticated yet again bearing witness to the creative passion of the men and women who work in symbiosis under its roof – some of them descending from a long line of watchmakers.

For Jaeger-LeCoultre, 2017 is an opportunity to reveal watchmaking treasures of stunning beauty from four of its iconic collections: Rendez-Vous, Reverso, Geophysic and Hybris Artistica™. After celebrating the Reverso's 85th anniversary in style in 2016, the time has come for the Manufacture to elevate the new Rendez-Vous line to the apex of ladies' watches; to highlight how the spirit of the Reverso Classic is freer than ever with its automatic movement perfectly embodying the Art Deco philosophy; to pursue the constant renewal of the Geophysic legend; and to showcase mysterious time by creating unique timepieces in very limited editions for the Hybris Artistica collection™.
