

THE NEW RENDEZ-VOUS WATCHES DON MIDNIGHT BLUE

This year, a number of new models are joining the Rendez-Vous women's collection. These pieces are connected by a common theme: the colour blue. Mingling mystery, elegance, and sophistication, deep midnight blue brings an infinitely graceful hint of originality to the wrist. The dials, straps, hands, and day/night indicators of the Rendez-Vous models are bathed in blue's majestic aura.

Rendez-Vous Night & Day Small and Rendez-Vous Night & Day Medium

Dazzling yet mysterious, the 29 mm or 34 mm stainless steel case of the Rendez-Vous Night & Day watch provides a magnificent setting for the extremely delicate day/night indicator complication.

Feminine and contrasting

The Rendez-Vous Night & Day watch reveals a playful contrast between a midnight blue dial and a dazzling, gem-set bezel. The sapphire crystal case-back uncovers part of the movement to lend a touch of sophistication to the watch.

Legible and delicate

The easily legible, powdered, silvered numerals on the dial of the Rendez-Vous Night & Day watch stand out delicately against the sunray-finished midnight blue dial.

Elegant and classic

The alligator leather strap of the Rendez-Vous Night & Day watch matches the dial and features tone-on-tone topstitching. As it incorporates an interchangeability system, the strap can be changed over and over again without requiring a single tool.

Jaeger-LeCoultre Calibre 967A (Small version)

This automatic mechanical movement contains 203 parts and a 42-hour power reserve.

Jaeger-LeCoultre Calibre 898A/1 (Medium version)

This automatic mechanical movement contains 204 parts and a 40-hour power reserve.

Rendez-Vous Night & Day

Exuding elegance down to its midnight blue, alligator leather strap, the Rendez-Vous Night & Day watch in stainless steel expresses femininity by day and by night. Its classic look is brimming with details waiting to be discovered.

A refined dial

The dial of the Rendez-Vous Night & Day watch captures the gaze and sparks the imagination with its delicate finishes. The guilloché finishes imitate wild silk to create a material-effect backdrop against which the floral numerals, scattered with mounted diamonds, perform a gentle farandole. The seconds hand and floral blue steel hands mark the passing of time while adding to the general feeling of elegance.

The sun and moon

In an opening at 6 o'clock on the dial, the sun and moon take turns to complete their daily course and indicate whether it is day or night. Their appearance brings a hint of poetry to telling the time.

Matching strap

The topstitched midnight blue alligator leather strap delicately recalls the colour of the hands of the day/night indicator, adding an extremely elegant note that flatters the wrist.

Jaeger-LeCoultre Calibre 898/1

This automatic mechanical movement contains 204 parts and has a 40-hour power reserve.

Rendez-Vous Tourbillon

The Rendez-Vous Tourbillon watch in white gold brings together Jaeger-LeCoultre's watch and jewellery know-how. Its dazzling finishes and captivating mechanism adorn the wrist with an uncommon spectacle.

A tribute to the tourbillon

At 6 o'clock, the fascinating, midnight blue dial of the Rendez-Vous Tourbillon watch reveals a glimpse of one of the most sophisticated watch complications: the tourbillon. This ingenious mechanism cancels out the negative effects of gravity on the movement in any position, granting the watch optimal accuracy.

Perfect proportions

A row of brilliant-cut diamonds encircles the heart of the Rendez-Vous Tourbillon's dial. This ring is then intersected by another precious circle to showcase the tourbillon. When combined with the gem-set bezel, they form a perfectly proportioned design.

Let there be light!

The Grande Maison's master jewellers have turned the Rendez-Vous Tourbillon in white gold into an exceptional jewel. The bezel is not the only part that dazzles; the case sides, the lugs and the crown – with its inverted diamond – also bathe the wrist in light and form contrasts with the midnight blue alligator leather strap.

Jaeger-LeCoultre Calibre 978

This automatic mechanical movement contains 302 parts and a 45-hour power reserve.

The Jaeger-LeCoultre Manufacture

We were born in La Vallée de Joux in the Swiss mountains in 1833.

Since day one, each watch, from the calibre to the case, is designed, made and assembled in our Manufacture by our master watchmakers. It demands inventiveness, determination, hard work and courage. How long it takes is irrelevant. What matters is how long it will last. This is the maker spirit.
